

CGSI E-Form

Professional Digital Signature Platform

Upload · Sign · Email · Done

Built for Securities & Financial Services

Next.js · Vercel Cloud · Secure Storage · Multi-language

Why CGSI E-Form?

01

Zero Installation

Clients sign directly in their browser. No app download, no plugin, no account creation needed.

02

Visual Positioning

Draw rectangles on the PDF to mark signature areas. Drag-and-drop simple. No coding required.

03

Auto Email Delivery

Signed PDFs are automatically emailed to any recipient you specify. One click, done.

04

Multi-Language

Supports English, Simplified Chinese, and Bahasa Melayu. Switch language with one click.

05

Multi-Device

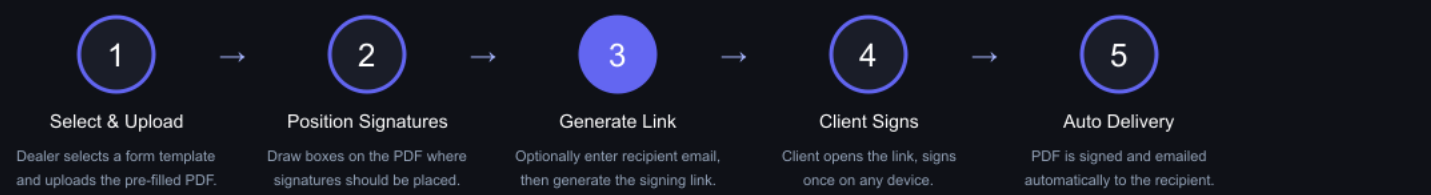

Works on desktop, tablet, and mobile. Dealers configure on desktop; clients sign anywhere.

06

Secure & Expiring

Each sign link is unique and expires after 7 days. No permanent client data stored.

[illegible]

The entire process takes less than 30 seconds for the client.

Dealers configure once. Clients sign in seconds. PDFs arrive automatically.

1. Log in with your shared dealer password
2. Select the form template from the available options
3. Fill the PDF form using any PDF editor (Edge, Acrobat, etc.)
4. Upload the filled PDF via the upload button
5. Open Setup tool to mark signature positions by drawing boxes
6. Enter recipient email (or leave blank for default)
7. Click "Generate Link" and send it to your client
8. The signed PDF is automatically emailed upon client submission

Pro Tip

Draw signature boxes slightly larger than expected. The signature image auto-scales to fit each box while maintaining aspect ratio.

The Client Journey

- > Receives the sign link via WeChat, SMS, or Email
- > Opens on any device — phone, tablet, or desktop
- > Reviews the form preview (form field data shown, if provided)
- > Signs once on the canvas signature pad
- > Clicks "Submit Signature" — done in seconds
- > The same signature is automatically applied to all required positions
- > Signed PDF downloads automatically; email copy arrives seconds later

Security & Privacy

Unique sign links cannot be guessed. Links expire after 7 days. No client data is permanently stored. No account or app installation required for clients.
